

Our Prepaid VoIP Solution

GlobalTouch prepaid service is branded under your name and logo and is designed for the residential caller. The Prepaid VoIP Solution includes basic POTS (Plain Old Telephone service) features. It may also be used while traveling worldwide wherever there is access to the Internet. It is designed to be offered through agents, marketing companies, entrepreneurs or even strategic partnerships with a

handset or other end-user device and to be managed by the end user via the on-line Communications Center.

Our Prepaid Solution is an important component of the GlobalTouch Telecom family of VoIP products and services.

GlobalTouch Prepaid VoIP Solution - Features

Call Waiting	Block / Unblock Caller ID
Call Forwarding	Block / Accept Anonymous Calls
3-Way Calling	Built in Called Party List
Voicemail to Email	Built in Call Timer
On-Line Account Management	Volume controls
End User Web Interface	Mute
Receives Incoming Calls	

GlobalTouch Telecom SoftPhone
can also be installed on Memory Sticks

User Control Panel

The on-line Communications Center is the way we communicate with the end user. It is the first screen you see when you Log-on. Users will find announcements; special money savings discounts and any new features that were added to your service.

The Communications Center appears as windows and pull-down menus and includes information such as:

- Log in and Log out
- My Rates
- Missed Calls
- My Preferences
- Download SoftPhone
- My Balance
- Call History
- Add Money to My Account
- SoftPhone Manual
- User Manual

All end-user Account Management is accomplished via the Communications Center.
